

RESEARCH FOR HEALTH IN HUMANITARIAN CRISIS

Final Study Report

GENERAL GUIDELINES

Please complete all sections but avoid duplication by referring instead to material presented elsewhere in the report. Please note that, due to the diverse nature of R2HC funded studies, some of the questions might not be relevant for your project. If you believe this is the case, briefly explain why in the space provided below for each of the questions concerned. Our aim is to enable R2HC grantees to report on their activities in a logical and proportionate manner. To that end, we have specified a tightly defined structure with space limits for some of the sections. There is, however, a dedicated final section to provide any further information or additional comments.

Please note that although the lead partner will submit this report, we encourage all other partners in the research team to participate in its preparation.

If you require further clarification to complete any of the sections in this form, or regarding our reporting processes and procedures, please contact the R2HC team for advice and guidance.

REPORT SECTIONS

1	RESEARCH STUDY BASIC INFORMATION	2
2	RESEARCH & METHODOLOGY OVERVIEW.....	3
3	RESEARCH OUTCOMES.....	5
4	RESEARCH OUTPUTS.....	7
5	RESEARCH UPTAKE & IMPACT.....	8
6	ETHICS.....	11
7	GENDER EQUITY AND SOCIAL INCLUSION.....	12
8	YOUR RESEARCH PARTNERSHIP.....	13
9	FINANCIAL MANAGEMENT	15
10	ADDITIONAL UPDATES / COMMENTS.....	17
11	USE OF ELRHA / R2HC TOOLS	18
12	FEEDBACK FOR THE R2HC PROGRAMME.....	18

1 RESEARCH STUDY BASIC INFORMATION

Research study title:

Research study reference #:

Main applicant organisation:

Contact person:

Principal Investigator/s:

Other study Partners:

Study location/s:

Start date:

End date:

Report submission date:

Research study abstract:

Please provide an abstract of the research, briefly describing:
[300 words maximum]

- 1) The subject and question/s addressed,
- 2) The research objectives,
- 3) To what extent these have been achieved.

2 RESEARCH & METHODOLOGY OVERVIEW

- 2.1 Please provide an overview of the research activities conducted, including variances (if any) from the study objectives outlined in your original application/work plan.

2.2 Please provide details of the methodology employed. Describe any adaptations/variations from the methodology outlined in your original application and justify the need for such changes and adjustments in relation to the research objectives/questions.

3 RESEARCH OUTCOMES

- 3.1 Please summarise your research findings. For each finding, explain how they strengthen the existing scientific body of evidence on which your research is focused.

3.2 Please describe any further analysis of the data from the research study that you intend to undertake.

4 RESEARCH OUTPUTS

Please provide details of peer-reviewed publications, 'grey literature', policy briefs, manuals, research data sets, or any other outputs produced from the research, and indicate whether these are all open access. If you have plans to produce any future outputs related to this research, list them below and indicate 'Planned' in the 'Date Published' column. If more space is required, please use section 10.

Type of Output (Peer-reviewed article, Dataset, etc.)	Output title	Brief Description	Authors and affiliation	Date Published (dd/mm/yyyy)	Publisher (Journal, Book, Website, etc.)	DOI / Hyperlink to the output	Open Access (Y/N)

5 RESEARCH UPTAKE & IMPACT

5.1 Overall, did you carry out the planned research uptake activities (dissemination and stakeholder engagement plans) as originally set out in your study proposal?

Yes No

5.2 Please summarise the activities and products delivered to engage stakeholders in your study and its results, and explain any changes to the original planned uptake and dissemination plans.

5.3 Please tell us about changes you envision or have already seen as a result of key stakeholders' engagement with your research study in the following areas¹ (If research impact cannot be evidenced yet, please indicate what you feel is likely to be achieved and the timeframe in which you expect this to happen).

Type of research impact	Short description of what has been achieved or you expect it will be achieved. By when?	Stakeholders engaged (Please provide detail: Organisation, Individual, Country, etc.)	Please refer to/link any evidence that demonstrates your role in the reported changes	How these changes led – or could lead to – positive impact for people affected by humanitarian crises. If you have evidence that impact is already occurring, report this too.	What else may be required to achieve impact, and for this to be sustained in the future (e.g., funding)
CONCEPTUAL: Impact on knowledge, understanding and attitudes.					

¹Please refer to [ODI's Research Excellence Framework \(REF\)](#), [ESRC's](#), and [R2HC's Impact toolkits](#) for further detail

Type of research impact	Short description of what has been achieved or you expect it will be achieved. By when?	Stakeholders engaged (Please provide detail: Organisation, Individual, Country, etc.)	Please refer to/link any evidence that demonstrates your role in the reported changes	How these changes led, or could lead to, positive impacts for people affected by humanitarian crises. If you have evidence that impact is already occurring, report this too.	What else may be required to achieve impact, and for this to be sustained in the future (e.g., funding)
INSTRUMENTAL: Impact on changes in policy and practice.					
CAPACITY: Impact on the capacity of researchers to conduct similar work in future OR on the capacity of stakeholders to access and use research.					
ENDURING CONNECTIVITY: Impact on the existence and strength of networks of people and organisations who understand and can make use of the research.					

5.4 Please reflect on what engagement activities or outputs were most useful in achieving research impact with certain stakeholders, and why you think this was the case. If there are any lessons learned or anything you wish you had done differently, you can also reflect on this.

6 ETHICS

Please describe how ethical issues were addressed at all stages of the research process. Please refer to the [R2HC Research Ethics Tool](#) if you require further details on the elements you could include in this section.

Research design and planning, including engagement of people affected by crises	
Research implementation, including engagement of people affected by crises	
Post-research, including engagement of people affected by crises	

7 GENDER EQUALITY AND SOCIAL INCLUSION

Please describe in what ways this study addresses gender equality and the inclusion of vulnerable and marginalised groups, and how your research findings will help promote gender equality and social inclusion during humanitarian crises.

8 YOUR RESEARCH PARTNERSHIP

- 8.1 Referring to the partnership initially described in your proposal, please explain how each partner has contributed to the results reported above. If an initially envisaged partner did not ultimately participate in the study or was replaced, please note this and explain why.

8.2 Please explain the approach your study team has taken to manage and support the partnership and explain how this allowed each partner to contribute to results. What worked well? What resources or activities supported the partnership?

8.3 What were the challenges encountered in managing the partnership, and how were they overcome? What approaches, resources or tools were useful for addressing partnership issues?

8.4 Will the partnership continue (formally or informally) beyond the grant?

Yes

No

9 FINANCIAL MANAGEMENT

- 9.1 Please provide a narrative summary of the project's expenses and how these differed (if at all) from the original budget.

9.2 What were the main challenges you faced in terms of financial management of the project, and how were they overcome?

10 ADDITIONAL UPDATES / COMMENTS

Please provide any other updates that may be of interest, including unforeseen achievements or opportunities that have arisen during the research and any additional comments not covered in previous sections.

If needed, use this section to expand on previous sections with limited space for responses (clearly stating the section & question you are referring to):

11 USE OF ELRHA / R2HC TOOLS

Please comment on whether and how you used any resources developed by Elrha or the R2HC to support your research study's design and delivery (e.g., Guide to Effective Partnerships, Partnership Agreement Template, Ethics Tool, etc.)

12 FEEDBACK FOR THE R2HC PROGRAMME

Please provide any feedback you might have for the R2HC team to help improve our support for grantees, and suggestions to enhance other aspects of the R2HC programme:

Thank you for completing this report. Your answers will help the R2HC to monitor and track the impact of our programme, enabling us to learn and improve as well as to continue championing the power of humanitarian research and innovation globally.

The R2HC team will get in touch if any information included in this report requires further clarification. In turn, please do contact us anytime if you wish to provide any update or supplementary information.
